

Cityside

2016 catalogue

Cityside's Mother company, SydneySide, has been the master craftsman of domestic joinery, specializing in the manufacturing of bespoke media furniture for the Australian market.

Our focus on storage solutions for audio and visual equipment has been widely acknowledged as the leader in its field.

Due to SydneySide's continuous success in the media furniture market, Cityside was birthed.

The Cityside collection has gradually evolved and expanded from just entertainment units, to now developing and manufacturing domestic furniture including coffee & occasional tables, sideboards & credenzas, dining tables & chairs, wall hung storage elements & floating shelves.

Our mindset is focused on clean lines, simplicity and quality of build.

The Cityside collection has been designed with the most discerning and astute clientele in mind.

Since our international launch, Cityside furniture is now globally loved by major countries such as the United Kingdom, Brazil, United States of America, New Zealand, The Netherlands and of course, Australia.

We are proud and excited to present our full range of products in this 2016 Cityside catalogue.

The Cityside Team.

The **Linear** series differentiates itself from other Cityside products by its unique, suspended, monolithic modern look of the repeated base modules.

Each wall-mounted base module of the Linear series combines an ultra thin top with a routed front panel to create a streamline look without handles.

Though compact in size, these base modules have been purposely designed to provide ample CD/DVD storage, and to cater for most contemporary audio and visual equipment, as well as gaming consoles on the market.

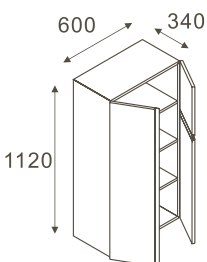

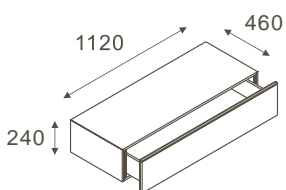

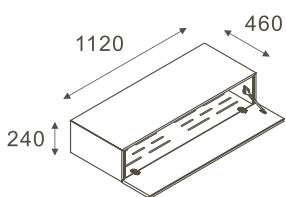

The configurations of the Linear Series are extremely flexible. Base modules can be mounted separately, side-by-side or even stacked to client's requirements, taste, and more importantly imagination.

For quite some time, the Cityside team has been in search of a cabinet design which can truly exemplify the principle of Minimalism, "Less is More". Now this cabinet design has finally come to fruition.

The Trace series is technically a refinement of an early Cityside entertainment unit series called Shadowline.

The elegance of **Trace** is obvious. The crisp lines and paper-thin look are the result of retracing and reworking the original edge detailing of Shadowline.

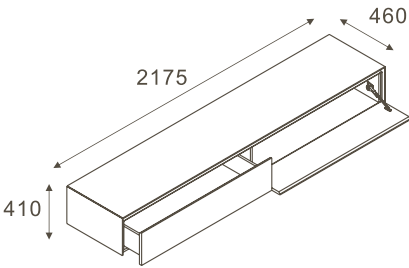

By cleverly reducing the appearance of standard panel thickness, each Trace cabinet seems to look lighter, more refined, sophisticated and yet solidly built.

When working with ultra modern interiors, Trace is an ideal choice to complement the aesthetics and lifestyle of minimalism.

The **TAYLOR** series combines a thin top and rounded front edge panels to create a streamline look free of handles.

Purpose designed to cater for most equipment on the market, **TAYLOR** will manage connectivity and organise storage. The open compartment is large enough to house popular gaming consoles and most DVD and Blu ray players. Larger equipment can be stored in the cupboards on either end and the drawers are perfect for storing spare remotes, games and discs.

BRANDO (Floating)

The BRANDO (Floating) is the next evolution of wall mounted floating entertainment units. Its sleek exterior conceals a storage drawer and a flap down door revealing ample space for most modern equipment.

Inside there is provision for ventilation, cable entry through the top or base, allowance for power and cable plates, combined with the BRANDO (floating) easy to install wall mounting track system.

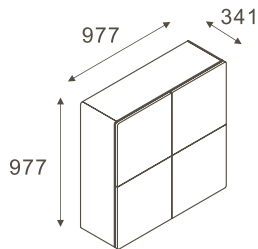

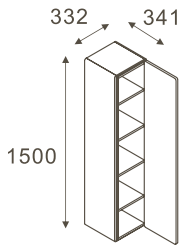

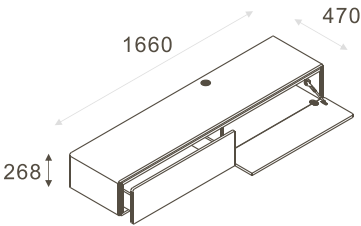

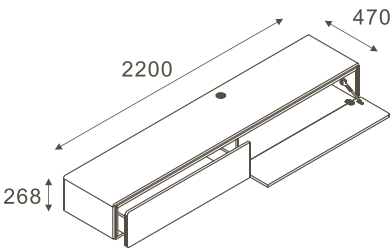

BRANDO (Free standing)

The BRANDO (Free standing) couples a sleek aesthetic with retro elements to create a contemporary look sought after in modern homes. Contained within are a storage drawer and a flap down door, revealing ample space for most modern equipment. A cutout in the back of the cabinet facilitates cable access.

Floating Shelf

Entertainment units on their own can be difficult to blend into existing home decor. For this Cityside has developed the iFS series of Floating Shelves. Matched to the sizes of the entertainment units they help create a unified solution to the entertainment area of the home.

The Floating Shelves feature a patented adjustable track mounting system developed by Cityside to ensure shelves are extra strong and installed level every time..

Maximum Capacity:
800mm - 30kgs / 1120mm - 33kgs
1660mm - 36kgs / 2200mm - 40kgs

iSD series

A low and compact sliding door unit, it is perfect for smaller apartment areas where doors and drawers can get in the way. The unique patterned door allows for remote controls to be used as well as providing ventilation for sensitive AV equipment. With their large storage areas and cable management, these units are the preferred choice for clients with a large collection of components.
